

**THERAPY TRIGGERED BY PREDICTION OF
DISORDERED BREATHING**

5

ABSTRACT OF THE DISCLOSURE

10 An approach to providing disordered breathing therapy includes providing therapy based on a prediction of disordered breathing. One or more patient conditions are detected and used to predict disordered breathing. Therapy is delivered to mitigate the predicted disordered breathing. The disordered breathing therapy may be adapted to enhance therapy efficacy and/or to reduce the impact of
15 the therapy to the patient.
